List of Questions in Expected Order:

1. Please tell us about your app idea (app overview, languages/frameworks used)
2. Why should there be a code critique app and how would it be useful?
3. Who are the users of your app?

      a. Explain user X? Y? Z? …
4. How would they use the app?
5. What data should the app collect?
      a. Where should you see it? How should you see it? Etc.
6. How should the data be stored with the app?
      a. Is there a specific way the data should be stored?
7. Is there a specific way the data should be shown to the user?
8. When or where will the app be used?
9. What information or content does the app show the user?
      a. How should it show to X users (Students)? Y users (Professors)?
10. Do you have any documents, such as flyers, forms, or spreadsheets, that you can share with us?
11. Is there a previous version that we could look at?
12. What type of devices or interactions would you see being used with the app?
13. (Once Professor Ureel answers a question, another question will be asked about their response or answer)
